---

We have been officially advised that the boundaries of the East Clay County Grading District, Clay County, Mississippi were extended effective February 24, 2017

The fire department for this District DOES PROVIDE PRIMARY RESPONSE to residential fires outside its legal boundaries

To assist you in determining the location of properties included in the East Clay County Grading District, we are enclosing a copy of a map showing the boundaries of the District

Any insurance contracts covering dwellings located in the District may be endorsed from February 24, 2017, on a pro rata basis to take advantage of the current fire premiums indicated in our Mississippi Dwelling Manual

It will be necessary that we survey or resurvey and publish or republish Loss Costs for specifically rated mercantile or special class properties which were brought inside the District by this action If you have a specific mercantile or special risk that you feel is affected by this expansion please advise our Rating Department so we will be able to schedule a survey by our District Representative during his next trip to this area Properties that have a needed fire flow greater than 3,500 gallons per minute require an individual property fire insurance classification

A computer printout will be mailed to those who submit a specific request The effective date of the Loss Costs will be made retroactive to February 24, 2017

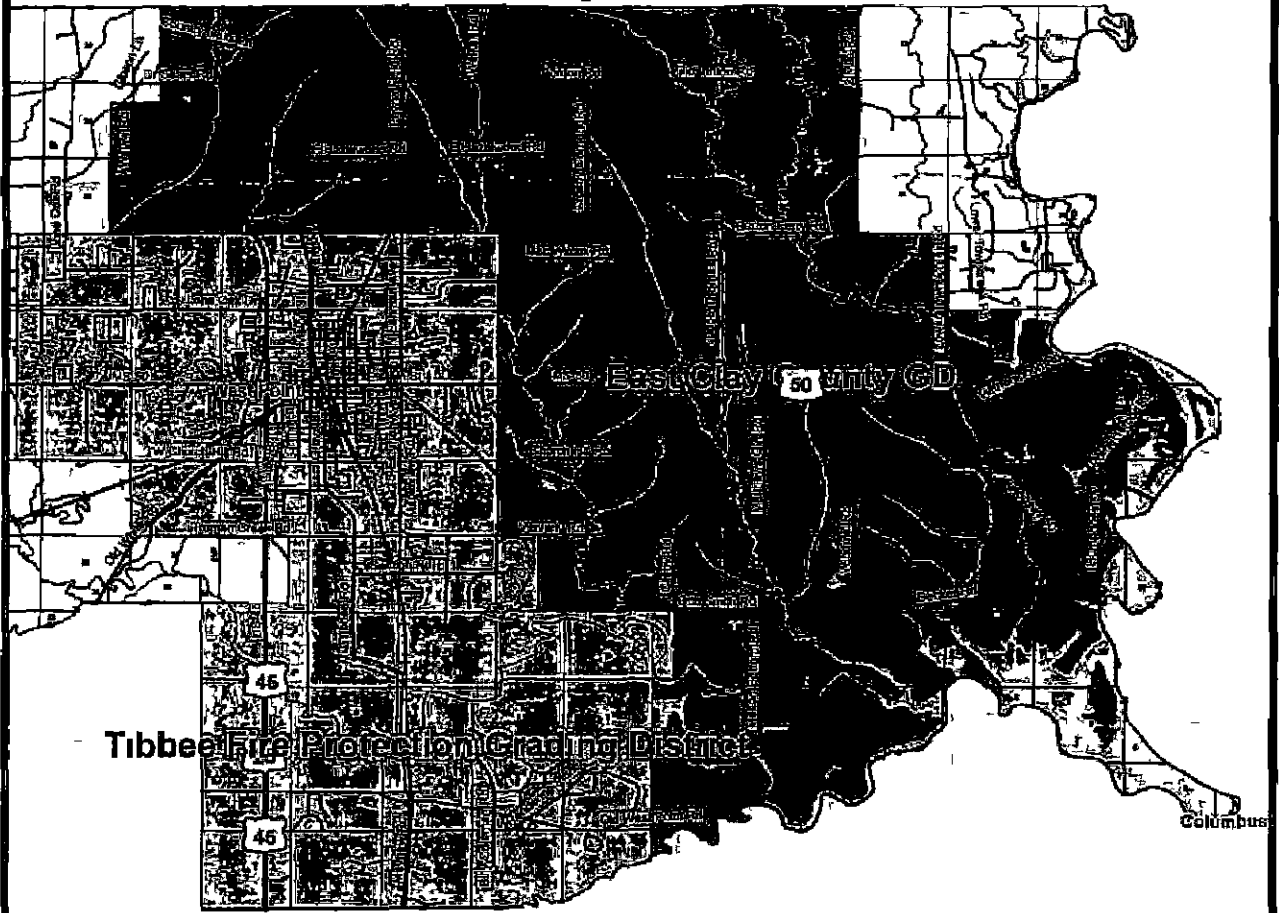

Following publication of information for class rated properties and Loss Costs for specifically rated properties, policies which cover these properties, and which have inception on or after February 24, 2017 may be endorsed from inception to the new rate, while policies having inception prior to February 24, 2017 may be endorsed from February 24, 2017, to expiration on a pro rata basis In calculating the new rates and premiums for these endorsements, the inception date of the policy or the last endorsed anniversary date determines the rate adjustment, if any, applicable

**F CONTROL** A hydrostatic control system for the power train shall be incorporated to provide the following functions

(1) **MANUAL MODE** - allows the operator to vary the Forward or Reverse speeds of the unit with the pump control to provide speeds from 0 to 20 MPH in high range, 0-9 MPH in low range and reverse

(2) **APPLICATION RATE CONTROL** - The application rate computer monitors the actual speed of the chippers, and varies the gate opening in order to maintain the set application rate of the selected aggregate, regardless of the speed of the chippers. The computer maintains a pre-settable memory for ten different aggregate application rate combinations. The preset application rate in memory can be selected or changed at any time. In addition, the application rate may be varied as desired during operation. The computer shall also have the ability to maintain a constant ground speed, regardless of load conditions

**G FRONT AXLE** Minimum 16,000 pound rated capacity, oscillating type

**H STEERING** Shall be fully hydraulic, orbitrol type

**I TIRES AND WHEELS** 385/65R Duplex radial tires, tubeless highway tread

**J BRAKES** Four wheel, rear axle is hydraulic actuated, spring-applied and hydraulic released. Front axle is hydraulic multiple wet disc type

Heavy duty rubber hopper skirting shall be provided to prevent spillage where truck meets the hopper. Feed gates shall be provided at each conveyor belt to control amount of flow to the spread hopper, and each gate must be easily adjustable from the operators platform without the use of tools:

**C. Conveyors:** Two 20" Heavy duty conveyor belts, 4-ply rated nylon rubber, individually powered by high-torque hydraulic motors. The hydraulic motors shall be independently activated by electrical solenoids and switches. Speed of conveyor belts to be individually controlled to give more uniform material distribution in front hopper. Conveyors automatically keep spread hopper full by using paddle switches to activate conveyor motors

**D Spread Hopper:** Spread hopper width shall be twelve feet (12'). The spread roll shall be constructed of 6" machine welded heavy wall tubing. Agitator of 2 1/4" tubing with quick disconnect drive. Each radial gate shall have individual, adjustable, spring-loaded, shut-off lever. Gates widths - 6" on ends and 12" in center

**E Front Hopper Rejection Screen:** A full width rock-type screen with 1-1/2" openings shall be placed over the spread hopper to retain all over-sized aggregates and foreign objects. The rejection screen shall consist of sections which are easily removed

**F Power Gate Control,** Hydraulic power spread hopper master gate control shall allow the driver to infinitely vary the gate opening from his operating station

#### **MISCELLANEOUS**

Unit to have at least one full-length walkway on right hand side of the conveyor system, allowing a second operator to control the level and disbursement of aggregate material in the spread hopper. Walkway to be safety tread plate and safety handrails shall be provided along the walkway. Left hand and right hand fenders to be provided for operator comfort and safety

With the bid shall be included manufacturer's descriptive literature and specifications on unit being bid, and a list of any exceptions to these specifications. Successful bidder will supply Operating Instruction Manual complete with a Parts Catalog
